## InfoComm 2019 infocomm

JUNE 12-14 2019 • ORLANDO, FL

### DesignMax loudspeakers

**DesignMax loudspeakers** bring outstanding audio and aesthetics to any commercial installation.

12 loudspeakers, from 2-inch, low-profile models to 8-inch, high-SPL compression-driver loudspeakers and outdoor-rated options

Dispersion Alignment system, in select models, ensures a more consistent listening experience

Custom Bose drivers for impressive sound, no DSP or EQ required. Use select Bose DSPs and amplifiers to enable Bose loudspeaker EQ and SmartBass processing

Elegant form factor, minimum-bezel grilles available in black or white, and removable logos

Patented QuickHold mounting system reduces installation time, strain, and hassle

### PowerSpace+ and PowerSpace versatile power amplifiers

New amplifier options for premium commercial applications

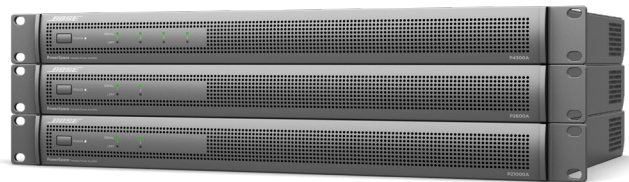

**PowerSpace+ P4150+ and P4300+**

Two models available with 150 or 300 watts per channel

Built-in DSP, including SmartBass processing, routing, level control, delays, limiters, Bose loudspeaker EQs, plus input and area EQs

PowerSpace configuration utility facilitates setup with an integrated webserver and intuitive browser-based UI

**PowerSpace P4300A, P2600A, and P21000A**

Multiple models available with 1000, 600, or 300 watts per channel to accommodate a wide range of installations

Bose AmpLink input for simplified multichannel digital audio connection

Load-independent outputs deliver full channel power to either low-impedance (4-8  $\Omega$ ) or high-impedance (70/100V) loads without bridging

## ArenaMatch DeltaQ array and ArenaMatch Utility loudspeakers

Featuring an IP55 weather rating, **ArenaMatch DeltaQ array modules and ArenaMatch Utility loudspeakers** make it easy to create outdoor loudspeaker systems that bring consistent, intelligible sound to every listener.

**Bose Professional ArenaMatch DeltaQ array modules** deliver proven DeltaQ sound quality and flexibility to outdoor installations — sports stadiums, arenas, outdoor entertainment centers, and more. Nine coverage patterns are available. Choose from modules with 10°, 20°, or 40° vertical coverage and easily swap between 60°, 80°, or 100° horizontal waveguides.

Built for zone-fill coverage or high-SPL foreground music, **Bose ArenaMatch Utility loudspeakers** feature similar tonal balance to ArenaMatch array modules — and the same EMB2S compression driver — but in compact designs. Deploy them to support larger ArenaMatch array systems or use them to provide intelligible, high-level sound in any outdoor area.

## ControlSpace EX line expansion

ControlSpace EX-440C, EX-12AEC, EX-1280

Introducing two new **ControlSpace processors optimized for conferencing** rooms — the EX-440C and EX-12AEC — and a new, high-powered **general purpose DSP** — the EX-1280.

The EX-440C and EX-1280 are compatible with the full range of Bose EX Dante® endpoints.

The EX-12AEC conferencing signal processor provides digital expansion for conference rooms using the EX-1280C processor.

## PowerShare adaptable power amplifiers with Dante connectivity

**PowerShare amplifiers** deliver outstanding audio performance and reliability with patented technologies inherited from the field-proven PowerMatch line — now with added flexibility. Using innovative PowerShare technology, the amp distributes total power across all output channels.

New models support Dante connectivity and programming via ControlSpace Designer software

600-watt and 400-watt models allow total power to be divided amongst 4 output channels

Configure any channel for low-impedance (4-8  $\Omega$ ) or high-impedance (70/100V) applications without bridging or using jumpers

PowerShare PS604D and PS404D
